

Round cylinders ESNU

FESTO

Key features

At a glance	
ESNU-8 ... 63	ESNU-8 ... 25
• Stainless steel piston rod • Good running performance and long service life • Piston rod with male and female thread	 • Extensive range of accessories makes it possible to install the cylinder virtually anywhere • The basic versions conform to ISO 6432, variants are based on these standards

Wide choice of variants	
ESNU-...	ESNU-...-MA
• Piston Ø 8 ... 63 mm • Cylinder barrel made of stainless steel • Bearing and end caps made of wrought aluminium alloy	• Piston Ø 8 ... 63 mm • Cylinder barrel made of stainless steel • Bearing cap with threaded flange • Short end cap with axial supply port

Cushioning types	
	Cushioning P
Operating mode	• The drive is fitted with polymer elastic end-position cushioning
Application	• Small loads • Low speeds • Low impact energies
Benefits	• No adjustment required • Saves time

Key features

Further variants		
Symbol	Key features	Description
	K2 Extended male piston rod thread	–
	K3 Female piston rod thread	–
	K5 Special piston rod thread	Metric standard thread to ISO
	K6 Shortened male piston rod thread	–
	K8 Extended piston rod	–
	A6 Metal scraper (32 ... 63 mm)	The cylinder has a hard-chrome-plated piston rod and metal scraper, which scrapes off hard particles (e.g. welding spatter) that stick to the piston rod. For use in welding systems, for example

Longer service life with bellows kit DADB

The bellows protects the piston rod, the seal and the bearing from the effects of a wide range of media, which has a positive impact on the service life of these components.

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air for the kit must be ducted via a pressure compensation hole in the connection part [1]. The kit protects the piston rod, seal and bearing against a wide variety of media, for example:

- Dust
- Chippings
- Oil
- Grease
- Petrol

Product range overview

 Note

1) Cannot be used on the bearing cap in combination with protective bellows kit DADB.

2) The bellows kit protects the cylinder (piston rod, seal and bearings) against a wide range of media and thus prevents premature wear.

It can only be used in combination with an extended piston rod (K8)

10 ... 50	34	55	55

Accessories

Travel speed v as a function of tubing length l

The bellows kit is a leak-free system.

To prevent unwanted media from being drawn in, the supply or exhaust air of the kit is ducted in the connection part via a pressure compensation opening.

The pressure generated in the bellows kit by the positioning motion is primarily defined by the travel speed and tubing length. The recommended tube length in relation to the travel speed of the drive can be read from the diagram.

Advancing

ESNU-20/25

ESNU-32/50/63

ESNU-40

Retracting

ESNU-20/25

ESNU-32

ESNU-40

ESNU-50/63

Note

The push-in fittings in the adjacent table must be used for the pressure compensation hole. Silencers can be used as an alternative. This reduces the travel speed slightly.

1) The dimension corresponds to the K8 value (extended piston rod) of the drive

Ordering data – Bellows kit

An extended piston rod (order code K8) is absolutely essential when using a bellows kit → Ordering data – Modular product system.

The necessary dimension for K8 as a function of piston diameter and cylinder stroke as well as the corresponding bellows kit is indicated in the table below:

Cylinder data			Protective bellows kit	
Ø	Stroke	Dimension for K8	Part no.	Type

Position transmitter

The position transmitter continuously senses the position of the piston.

It has an analogue output with an output signal that is proportional to the piston position.
