Water separators MS-LWS, MS series

FESTO

Service unit components of the MS series

Solutions for every application

With its large product range, highly effective components and a wide choice of functions, the MS series from Festo offers a complete concept for compressed air preparation. It is suitable for simple standard applications as well as for application-specific solutions with very high-quality requirements.

Available as individual components, pre-assembled combinations ex-stock, application-specific combinations or complete ready-to-install solutions. The five sizes in the MS series achieve maximum flow rates with low space requirements.

Freely combinable functional modules

Pressure regulators, on/off and soft-start valves with safety function, filters, pressure and flow sensors, dryers, sensors and lubricators can be assembled into a suitable solution for every task. Thanks to the modular structure the components can be combined as required. The simple connection system saves time because

there is no need to disassemble the entire combination when replacing individual modules. Many of the components are also UL and ATEX certified.

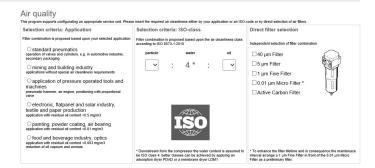

CAD models and configurator

Convenient tools for planning and selecting application-specific individual components and combinations. The product configurator can be used to configure customised solutions quickly and to transfer the order data without any hassle.

Engineering tools

Selection tool for choosing the right service unit combination without oversizing, and with the right air purity class:

Soft-start/quick exhaust valves MS6-SV/MS9-SV

Saving energy

Service unit combinations MSE6

Intelligent mix of sizes

- Reliable compressed air preparation and system supply
- Integrated or stand-alone
- Easy to connect with M8/M12 plug

- Fast and reliable exhausting of systems up to Performance Level e, certified to EN ISO 13849-1
- Integrated soft-start function

- Fully automatic monitoring and regulation of compressed air supply
- Compressed air is automatically shut off in stand-by mode
- Detection and notification of leakages
- Condition monitoring of relevant process data

- Optimum flow rate with a size that is up to 18% smaller
- · Excellent energy efficiency
- Cost-optimised combinations save up to 30%!

Size differences						
Size		MS2	MS4	MS6	MS9	MS12
Grid dimension	[mm]	25	40	62	90	124
Connection sizes		M5, QS-6	G1/8, G1/4, G3/8		G1/2, G3/4, G1, G1 1/4, G1 1/2	G1, G1 1/4, G1 1/2, G2
Standard nominal flow rate qnN ¹⁾	[l/min]	350	1800	6500	20000	22000

¹⁾ Using pressure regulator MS-LR as an example

Note

Information

The next few pages provide a brief overview of the product range for the components of the MS series service units.

You can find detailed information and all the technical data in the documentation for the relevant service unit component.

Accessories such as connecting plates or mounting brackets can be ordered either via the configurator or separately.

Designing a service unit combination

The order of the individual components within a service unit combination is relevant for safety and functionality. The service unit components cannot be combined in any order in the flow direction. They are subject to restrictions and rules.

The configurator for the service unit combination MSB is a reliable and convenient way of combining the individual service unit components and ensures compliance with the applicable rules. As a result, you get a fully assembled unit, including UL or ATEX certification, if necessary.

When combining a unit from individually configured and ordered service unit components, the points on the right must be adhered to under all circumstances.

- Regulators MS-LFR/LR/LRP are only permissible in the flow direction with the same or decreasing pressure regulation range
- Filters MS-LFR/LF/LFM/LFX are only permissible in the flow direction with an increasing grade of filtration
- Lubricators MS-LOE are not permitted in the flow direction upstream of a filter MS-LFR/ LFM/LF/LFX, water separator MS-LWS or membrane air dryer MS-LDM1
- A micro filter MS-LFM must be installed in the flow direction upstream of an activated carbon filter MS-LFX or membrane air dryer MS-LDM1
- A flow sensor SFAM cannot be installed directly downstream of a regulator MS-LFR/LR; a branching module MS-FRM must be positioned between them
- A soft-start/quick exhaust valve MS-SV must be the last service unit component in the flow direction

Water separators MS6-LWS, MS series

Datasheet

Fully automatic condensate drain

- 11

Flow rate 2400 ... 3800 l/min

Temperature range +1 ... +60 °C

Operating pressure 0.8 ... 16 bar

www.festo.com

The maintenance-free water separator removes condensate from the compressed air.

- Constantly high condensate separation (99%) up to the maximum flow rate
- Metal bowl

 Available with fully automatic or fully automatic, electrically actuated condensate drain • Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

Water separators MS9-LWS, MS series

Datasheet

Fully automatic condensate drain

- | | - |

Flow rate 12000 ... 15000 l/min

Temperature range +1 ... +60 °C

Operating pressure 0.8 ... 16 bar

The water separator removes condensate from the compressed air.

- Constantly high condensate separation (99%) up to the maximum flow rate
- Metal bowl
- Available with fully automatic or fully automatic, electrically actuated condensate drain
- Optional device variant EX4 for use in potentially explosive areas in zones 1, 2, 21 and 22

Water separators MS12-LWS, MS series

Datasheet

Fully automatic condensate drain

- 11 -

Flow rate 25000 l/min

Temperature range

Operating pressure 0.8 ... 16 bar

 Available with fully automatic or fully automatic, electrically actuated condensate drain

General technical data		
Pneumatic connection 1, 2		
Connecting plate AG	G1, G1 1/4, G1 1/2 or G2	
Connecting plate AQ	NPT1, NPT1 1/4, NPT1 1/2 or NPT2	
Module without connecting thread/connecting plate G	-	
Design	Centrifugal separator	
Type of mounting	With accessories	
	In-line installation	
Mounting position	Vertical ±5°	
Air purity class at the output	Compressed air to ISO 8573-1:2010 [-:7:4]	
Bowl guard	Integrated as metal bowl	
Condensate drain	Fully automatic	
	Fully automatic, electrically actuated	
Degree of condensate separation [%]	99	
Max. condensate volume [ml]	400	

Note: This product conforms to ISO 1179-1 and ISO 228-1.

Flow rates		
Standard nominal flow rate q _{nN} ¹⁾	[l/min]	25000 ±15%
Max. standard flow rate	[l/min]	40000 ±15%
q _{n max} .		

¹⁾ Measured at p1 = 6 bar and Δp = 0.5 bar

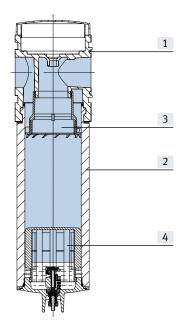

Operating and environmental conditions						
Condensate drain		Fully automatic	Fully automatic, electrically actuated			
		V	E2/E3/E4			
Operating pressure	[bar]	212	0.8 16
