

# Sensor bracket SIEZ-B-18

Part number: 538350

 [General operating condition](#)

## Data sheet

| Feature                                     | Value                   |
|---------------------------------------------|-------------------------|
| Ambient temperature                         | -25 °C ... 80 °C        |
| Size                                        | M18                     |
| Type of mounting                            | With through-hole       |
| Product weight                              | 21 g                    |
| Material housing                            | PA-reinforced           |
| Corrosion resistance class CRC              | 0 - No corrosion stress |
| Additional information for sensor selection | Mounting component      |
