

# Common supply manifold OABM-P-G1-36-4

Part number: 8100284

FESTO

 [General operating condition](#)

## Data sheet

| Feature                        | Value                         |
|--------------------------------|-------------------------------|
| Number of device positions     | 4                             |
| Corrosion resistance class CRC | 2 - Moderate corrosion stress |
| LABS (PWIS) conformity         | VDMA24364-B1/B2-L             |
| Product weight                 | 1327 g                        |
| Type of mounting               | With through-hole             |
| Pneumatic connection, port 1   | G3/4                          |
| Note on materials              | RoHS-compliant                |
| Material sub-base              | Wrought aluminium alloy       |
